POLE CARE AND SYSTEM MAINTENANCE:

The live of your basketball system depends on many variables. The climate, exposure to corrosives such as salt, pesticides or herbicides and excessive use or misuse can all contribute to pole failure, which may cause property damage or personal injury.

Check your basketball system frequently for loose harware, excessive ware and signs of corrosion. For safety reasons and to prolong the life of your basketball system, you must take the following preventive measures:

- * Check all nuts and bolts. If any are losse, tighten them.
- * Check all pole sections for visible rust, chipped or cracked paint. If either are present, do the following:
- 1. Use an emery cloth to completely remove any rust or chipped paint.
- 2. Chean the area with a damp cloth and allow it to dry.
- 3. Apply two coats of a rust preventative, hight gloss enamel to the area. Allow the paint to dry between two coats.
